# A Note from the Chair...

*Dear Colleagues,*

**Digital therapeutics continue to be among the hottest topics in healthcare.** Acclaim for their promise to meet the “triple aim” goals of improved medical outcomes, lower costs, and better patient experiences of care has raised vitally important questions.

Will, how, and when will these treatments become commonplace within provider and payer care plans? What level of clinical development and commercial success has already been achieved and what does the pipeline look like?

Answers will be provided at **DTx West 2019** in San Mateo, California on February 26-28 - *the* must-attend meeting for the digital therapeutics industry and its stakeholders.

The previous DTx meeting in Boston was a sold-out, smash hit. Speakers and panels nailed crucial topics such as reimbursement pathways, value-based business models, pharma partnerships, regulatory success factors, and timing for major digital transformations occurring within our healthcare ecosystem.

DTx West 2019 has booked an industry-defining speaker faculty to lead provocative discussions and dissertations. **Over 200 senior leaders** from digital therapeutic companies, pharma, payers, investors and providers will attend to capitalize on the opportunity to collaborate and learn.

The pace of change in digital health is very fast and DTx West is capturing all of it so that meeting attendees will adjourn fully armed with facts and intelligence to help ensure their own successful strategic planning.

**Book your registration now** for Feb 26-28 in San Mateo, CA before it fills up. You won't want to miss it.

Best regards,

Joel  
Chief Commercial Officer  
Click Therapeutics  
Chairman of DTx West 2019
